

New Techniques Program

Timber Flooring Installation, Sand and Finish, Repair and Recoat

About the New Techniques Program

This program introduces some of the best installers, sanders and finishers within Australia who will demonstrate and get you involved in the techniques they have refined over many years as well as acquired from our US counterparts. As the name suggests they will conduct various activities including timber flooring installation, sanding and finishing, repairing and recoating. This program is not one to teach you what you already know, as the title suggests, it aims to provide you with alternate techniques, as well as specialist methods you can quickly learn and apply every day.

This team of instructors have successfully been conducting this course for several years and the feedback is amazing. Their style of delivery and the way they get you involved is exhilarating.
